
WHAT IS QUANTITY SURVEYING?

WE ASKED QUANTITY SURVEYORS TO EXPLAIN THEIR JOB.... IN A POEM!

*We assess the quantities,
Of various types of properties.
Our knowledge of contracts and legislation,
Keeps our clients from litigation.
Using the latest technology and various devices,
We are experts in providing construction prices.
If constructions your thing and want to be a big
player,
Come and be a Quantity Surveyor.*

*What is a QS you say?
Let me tell you about a typical QS working day.
We provide Client's with project cost advice,
To ensure their project budget will suffice.
We work on projects from the idea to
completion phase.
Providing reports such as cost plans to tenders,
progress claims & cashflow schedules.
Our involvement in property and construction
projects is significantly key.
A career as a QS is something you should
consider to be!*

*I'm sure as a teen, you have a dream,
If it's to travel, Quantity Surveying will dazzle
Whether it be a builder, a developer or some
kind of project manager
In all different places, you'll be able to work
and learn
So don't be concerned, the AIQS will have
your back
Cause the skills you discover will prevent any
job hack
Simply put, our confession is,
this is the best profession!*

*Being a surveyor rocks
You don't wear a tie or work in a box
The architect may be cool
And the engineer has a big slide rule
But when the boss is in trouble
He looks for the man who's not in a bubble
He comes to me
Because I am free
And know how much everything costs.
And as we all know it's the man with cash
Who is the real boss.
So join the team and become a surveyor.*
